SOFT SKILLS

- Proactivity
- Organization
- Leadership
- Adaptability
- Work ethic
- Communication
- Problem solving
- Flexibility
- Patience
- Empathy

PERSONAL

I've always been a math and technology driven person, so I decided to pursue Information System studies where I found a good passion for programming and problem solving.

I still have a lot to learn since technology is an ongoing process but I love teaching what I've learned so far to others around me.

I believe communication and being proactive are the key to success.

PROFESSIONAL

MID-LEVEL BACK-END SOFTWARE ENGINEER
